

A New Week? And Two Great New Services: Missed Call Alert and Prepaid Data Roaming

'New,' is a word you'll hear being used all the time at Afghan Wireless. This week, we're launching two new products: **Missed Call Alert (MCA)**, and **Prepaid Data Roaming**.

Missed Call Alert (MCA):

AWCC's Missed Call Alert provides you with a notification every time you miss a call—even when your device is off, or if you've traveled outside of our service area. We're launching our MCA service in phases—and I know that some of you who are reading this post, are enjoying your MCA service right now. We're excited about the initial popularity of our MCA service and we'll be offering MCA to all of our customers in the days ahead.

Prepaid Data Roaming:

Now, our prepaid customers can use their data plans in ten countries—for as little as 3AFN. So whether you're traveling to Uzbekistan or the USA, you can use your Afghan Wireless device to stay connected to friends and family at home. Our Prepaid Data Roaming Service is available to all Afghan Wireless customers. You can activate your Prepaid Roaming Service by dialing 152 from your Afghan Wireless device.

Everyday at Afghan Wireless, we're creating new products, new services and new technologies that connect you to the people and places you love most here in Afghanistan—and around the world. So please keep calling, connecting and roaming!

Until next time,

Ehsan
