

AFGHAN WIRELESS AND APPLE BRING iPhone SE TO AFGHANISTAN

Afghan Wireless and Apple, Inc.: as of April 17th, both companies will share more than the letter 'A' in their names! On Sunday, April 17th, Afghan Wireless and Apple will celebrate the launch of our strategic partnership with the debut of the iPhone SE at our AWCC Brand Shops. In fact, you can view the display model of our iPhone SE right now, at our Kabul City location.

Available **only** from Afghan Wireless, the iPhone SE is Apple's most advanced communications device and it is the most powerful four-inch phone ever developed. Our Business and Consumer clients will be able to choose from two versions of the iPhone SE: 16GB and 64GB model. Both editions of the iPhone SE are available in an amazing array of colors: Gold, Rose Gold, Silver and Space Gray.

We plan to debut the iPhone SE at our AWCC Brand Shops located in Kabul City. My colleagues and I are expecting extremely strong demand for the iPhone SE, so AWCC plans to make the iPhone SE available in our Brand Shops throughout Afghanistan by the end of 2016.

AWCC's partnership with Apple is the latest example of how the men and women of Afghan Wireless strive every day to accomplish our Company's most important mission: from the iPhone SE, to the fastest Internet, we at Afghan Wireless will always

provide you with the most innovative communications network, and the most advanced phones, products and services which connect you to the most important people and places in your life.

We're proud of our partnership with Apple. But most importantly, we're proud, and honored by our fourteen-year partnership with you.

Until next time,

Ehsan
