AFGHAN WIRELESS LAUNCHES 3.75G+ HIGH SPEED BROADBAND SERVICES IN KUNDUZ AND BADAKSHAN PROVINCES

Kabul, Afghanistan ? February 20, 2016 ? The Afghan Wireless Communication Company (AWCC) (www.afghan-wireless.com), the nation's first mobile communications company, the founder of Afghanistan's mobile communications market and a leading provider of voice and data services to over 4,000,000 consumers and businesses, announced the expansion of its 3.75G+ high-speed network service to Kunduz and Badakshan Provinces.

Afghan Wireless 3.75G+ service is the high speed service in the country that has covered Kandahar, Helmand, Jalalabad and now Kunduz and Badakshan provinces after the debut of the service in the capital, and has provided speediest services to our compatriots.

AWCC's Kunduz and Badakshan based clients can now use their 3.75G high-speed broadband service, to send and receive the largest data files, access the fastest download speeds and utilize an array of the most innovative file sharing, streaming, video and data services.

Afghan Wireless Communication Company, with its excessive endeavors and wide activities during past 13 years, has always been tried to bring the latest and advanced technology to Afghanistan and is committed for development, progress and empowerment of economic growth of Afghanistan since beginning of its activities.

During last months, our customers are as well witness of two latest initiatives of afghan wireless, HD Voice and Super Wi-Fi services; AWCC's HD Voice Service incorporates Noise Cancelation technology which significantly reduces background sound, enabling caller's clear, crisp, natural voice transmission, which allows AWCC's clients to conduct the highest quality of mobile voice communications available in Afghanistan today.

Afghan Wireless Communication Company is proud that has implemented Internet Protocol version 6 (IPv6) as part of its deployment, making AWCC the first and only mobile communications company in Afghanistan with IPv6 today and illustrates, once again, that AWCC is far better positioned than its competitors. AWCC's 3G is high speed service with a capacity of 3.75G+, making AWCC's 3G speed standard in WCDMA which is unique and exclusive in the country.

Afghan Wireless Communication Company is committed for economic growth and development of Afghanistan, by providing employment to more than 6,000 Afghans through its direct operations and to more than 100,000 other Afghan citizens through its ecosystem of dealers and vendors is considered as a large private employer of Afghanistan which has provided a vast opportunity of employment to our compatriots.
